Sorry, the train has no interest in keeping its schedule today.

If you go ahead and meet at 8:30 I can catch up with Terry or Eugene when I get in.

Janine

Spoke with Dennis last night.

Janine and Terry: Let's get together for a few minutes early this morning instead. How about 8:30 am in my office ?

Thanks,

Tito

Yep ! I didn't think so ...

Dana T.: Do you want me to call Dennis ?

Actually scribe data is only numerical data. It does not contain raw instrument data

This is what we are getting thus far. I believe that we'll need to request the full data packages.

The region has offered to grant us access to the scribe database being used. I had resisted getting such access, just because I don't want to go and mess around in the database, but if Janine and Terry are ok doing so, we can get it. Otherwise, we will have to request that they send us anything else that accompanies the data results they have sent us.

Janine and Terry: Thoughts/opinions ?

Thanks Tito, are we looking the full data packages as well, sorry, but these are results only. Also, I still haven't heard back from Ramona for ORD help.

Janine and Terry:

You now have several notes from me on Dimock ... here's another one, based on discussions of a few minutes ago during the Sr. Leadership Dimock calls.

We need to strive to complete the HQ EU review of the data by mid-day tomorrow (ie, Wednesday) in order to communicate any issues, findings, etc.

Also, we need to be able to represent that the HQ EU review is an independent/peer review and not just a check on the review the region is conducting and their findings. We can discuss further tomorrow, but the main thing about this point is that we need to make sure that we are getting everything and anything needed in terms of the data, etc. to represent our review in such a manner. Let me know if there is anything else we need that we are not getting and I'll talk to Dennis about it to make sure that we do get.

Thanks,

Tito

Received your note below Kelley.

Terry and Janine: I know that you've already looked at data received late last week, but please be sure to give these data sheets a thorough review and discuss with the key R3 technical experts any questions you have. Please make this a priority.

Thanks,

Subject: Dimock - Week #2 Residential Data Summary Reports for Your Review

I have attached PDFs of the 20 locations sampled during week #2 (1/30/12 - 2/3/12). Please note that while the data has been validated and is considered final, we are still in the process of finalizing the data summary reports. I understand that

you will be providing additional support in terms of data review prior to release to the public. Please be sure to limit the distribution of these reports to an internal review as we have not yet shared the data with residents or with PADEP.

Please note that we are aware that in many cases the established "trigger levels" are lower than the actual detection limits. The R3 tox is taking this into account in her review. We will be prepared to answer questions regarding this issue as they come up during our meetings with residents. In addition to the data summary reports, I have also included a spreadsheet listing the trigger levels established, to date. A key to the data report is also included.

Please feel free to contact me with any questions and/or if you need additional info.

Thank you - Kelley
